beauty, creativity, and safety
operating in unison
COOL-Pack Technology

The glass temperatures on a gas fireplace typically range ±500°F. Even momentary contact at these extreme temperatures would result in serious burns to the skin.

Montigo’s patented COOL-Pack and Power COOL-Pack glass technologies have been designed to significantly increase safety by maintaining glass temperatures as low as 115°F (46°C).

COOL-Pack technology makes it safe to touch the glass, reducing associated liability risks for the property owner.

Venting

Montigo power vents are designed and manufactured in-house to ensure an optimized fireplace system is created.

Our power venting system allows for unlimited vent lengths, turns, and even downwards slopes without affecting the safety or aesthetic of the fireplace. Venting between the fireplace and termination can be run well beyond 500ft.

Multiple power venting options provide flexibility:

External
- Roof
- Wall
- Updraft (low profile)

Internal
- Inline
- Flush Wall

Vent Free (outdoor only)
- Front
- Rear

Intake Locations

Montigo develops all units from an installation friendly perspective.

Multiple intake location options mean the fireplace will not dictate, but adapt to your design. Intake location options vary depending on configuration and size of unit.

Six options provide adaptability:

- Bottom
- One Side
- Front
- Both Sides
- Rear
- Top

Linear Flame Patterns

- Ribbon
- Hi-Low
Configurations

- Single Sided See Through Corner L/R
- Four Sided Single Sided See Through Panorama Peninsula Open Firepit
- Round Octagon Tornado
- Custom hood available
- Shown with optional custom hood

burner styles

- Traditional
- Linear
- Round
- Octagon
- Tornado

NOTE: Burner styles may not be compatible with all unit configurations.

Montigo Custom Commercial

Montigo is proud to offer a true "custom commercial" program where you can bring your ideas to life. Whether it’s a simple custom dimension for a traditional style, an elongated or complicated venting run, or a vision for a cutting-edge design, Montigo is your solution provider.

With decades of manufacturing excellence, collaborative relationships with architects and designers, and an instinctive drive to lead the fireplace revolution, Montigo delivers the perfect fireplace to fit your style – if you can dream it, the Montigo engineers can build it.

Every unit passes through extensive pre-shipment testing at our in-house CSA accredited lab and leaves our factory bearing the CSA logo.

Innovative design, crafted with care, and unique to each installation. From private luxury homes, to hotels, casinos, restaurants, and other public spaces, a fire feature is the heart of every warm and inviting space.
