PRODIGY II

MONTIGO

PRODIGY II

ELEVATED BY DESIGN

Designed to elevate both style and comfort, the Prodigy II blends modern innovation with thoughtful detail. Its advanced cool-touch glass keeps the front surface safe and comfortable, while the clean, zero-clearance design allows for endless finishing possibilities right up to the opening—including wood and other traditional materials.

The full coverage media tray creates a seamless, refined appearance, and brilliant LED uplighting spans the entire firebed to enhance every flame. The result is a striking centerpiece that offers complete design freedom without compromising performance or safety.

PRODIGY II / P2ST520N / GLACIER FIRESTONES

COOL-PACK SAFETY BARRIER

The front glass is cool to touch with the usage of the Montigo COOL-Pack glass system

FULL COVERAGE MEDIA TRAY

The space between the glass panels, which is used to provide the cool touch capabilities—can be completely covered with glass or stone media.

ADAPTABLE VENTING

3', 4', 5' units come with two 8" intakes, though only one is needed for operation.

ZERO CLEARANCE

Framing and facing materials are cleared for wood framing and combustible facing

STANDARD LED UPLIGHTING

LED lighting covers the entire length and width of the firebed, including the area between the glass panels

CONTROL SYSTEM

The Prodigy II puts effortless control at your fingertips, letting you operate your fireplace with the included remote or enjoy the added convenience of managing it directly from your phone.
